

Since 1960, *Esencias Martínez Lozano S.A.* deals with the production of **top-quality Essential Oils**.

We are in the **South-East of Spain**, the main area in the production of Spanish Oils, specifically in Caravaca de la Cruz, Murcia.

We own **more than 700 hectares** of crops to grow up the aromatic herbs we use to get our oils, these being our main asset.

**Every single oil we trade comes from a careful process.** Our own laboratory controls the selection of the best aromatic plant, this being the mother seed for the crops. Once the harvest season takes place we proceed with the distillation and the Managing Board (the founder Antonio Lozano, and their sons) evaluate the result. Finally, Quality Control Team manages the packaging and the store. Care and love in every single step to guarantee the best quality in the oils we trade.

All our Essential Oils comply with Current Regulatory Framework set by **Cosmetics, Perfumery, Flavors & Fragrances, Healthcare, Household, and Aromatherapy Markets**.

Export represents more than the 80% of our sales. We are well-known worldwide.

## THE WISDOM SEEDS IN THE WORLD OF ESSENTIAL OILS
